

Hosted Payment Pages

PCI-COMPLIANT ONLINE PAYMENT PAGES WITH A CUSTOMIZED LOOK AND FEEL

SecureNet's Hosted Payment Pages service provides e-commerce merchants with PCI-compliant web pages for collecting online payments while maintaining a consistent "look and feel" for a seamless online payment experience.

FEATURES

- Customizable "look and feel" to mirror merchant's existing web site design.
- Available payment confirmation page with the ability to post order confirmation numbers.
- URL "hiding" so shoppers never know they have left the merchant's web site.
- Fewer abandoned purchases and more completed orders.

SECURITY

- Fully PCI-compliant payment pages.
- Higher security without additional setup, hosting and auditing costs.
- No payment account data stored in your web application or on your servers.
- All data stored in SecureNet's state of the art PCI-compliant data centers.

CUSTOMIZATION

- Integration of merchant's CSS stylesheet in addition to matching of general color themes, fonts, logos and graphics.
- No harsh transitions from the merchant's web site to another company's external checkout page.
- Fully customizable fields for additional data collection.
